

TuffStuff® / TuffStuff Plus®

STYLE 23: A WARCO BILTRITE Performance Product

TUFF STUFF

Tuff-Stuff® Natural Rubber is an outstanding abrasion resistant material. Tuff-Stuff® delivers an optimum combination of tear, abrasion, noise, and impact resistance resulting in reduced maintenance costs and longer service life from capital equipment. Tuff-Stuff® and Tuff-Stuff Plus® have each been specifically formulated and field proven to deliver the ultimate in durability and long life for high production mineral and aggregate facilities. Tear Resistance (Die C) = 200 PPI.

Red in color.

Finish: Smooth

Durometer Hardness Shore ± 5	Thickness Inches	Width Inches	Tensile* psi	Ultimate Elongation* %	Temperature Range	Estimated Weight Per Linear Foot (1/8" x 36")	Specifications
40	1/8 thru 2	36, 48	3200	650	-40°F to +160°F	1.93 lb	ASTM D 2000 4AA 430 F17 G21

*Typical Values

STYLE 24: A WARCO BILTRITE Engineered Product

TUFF STUFF *plus*

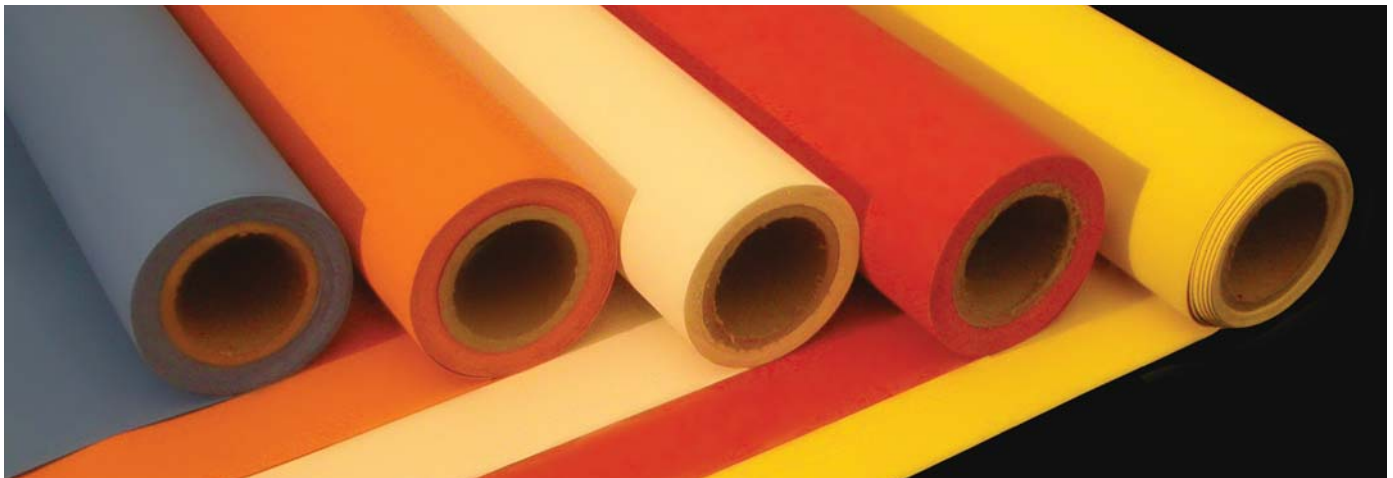

This Natural Rubber material is supplied with a .062" layer of 60 durometer black Neoprene vulcanized to one side. This compound has been designed to bond to most substrates. Apply your adhesive to the side with the black neoprene layer. The black layer is also useful as a wear indicator. We recommend that you thoroughly test the material with your adhesive before using this material in any application. All adhesives vary to some degree and each adhesive will react differently with any rubber compound. Tear Resistance (Die C) = 200 PPI.

Red in color.
